

DRAFT

Lower Flat Creek and

Stubblefield Accesses

Ten-Year Area Management Plan

FY 2015–2024

OVERVIEW

Area Name	Area Number	Date Acquired	Acreage	County	Administrative Responsibility	Maintenance Responsibility
Lower Flat Creek Access	6808	1968	4	Barry	Forestry	Forestry
Stubblefield Access	7610	1976	56	Barry	Forestry	Forestry

Statements of Purpose:

A. Strategic Direction

These areas are managed to provide public fishing access to Flat Creek for boat and bank anglers.

B. Desired Future Condition

The desired future condition of these accesses is to provide boat and bank access while maintaining appropriate riparian corridors along Flat Creek.

C. Federal Aid Statement

Lower Flat Creek Access: N/A

Stubblefield Access, or a portion thereof, was acquired with Dingell-Johnson Sport Fish Restoration funds to restore and manage sport fish, conserve and restore sport fish habitat (or a buffer to protect that habitat) and provide public access for sport fishing.

GENERAL INFORMATION AND CONDITIONS

I. Special Considerations

Area Name	Priority Areas	Natural Areas	Other
Lower Flat Creek Access	None	None	N/A
Stubblefield Access	None	None	Demonstration – Stream bank stabilization project

II. Important Natural Features and Resources

Area Name	Species of Conservation Concern	Caves	Springs
Lower Flat Creek Access	Yes ¹	None	None
Stubblefield Access	None	None	None

¹ Species of conservation concern are known from this area. Area Managers should consult the Natural Heritage Database annually and review all management activities with the Natural History Biologist.

III. Existing Infrastructure

Area Name	Concrete Boat Ramp	Gravel Bar Access	Parking Areas
Lower Flat Creek Access	None	1	1
Stubblefield Access	None	1	1

IV. Area Restrictions or Limitations

Area Name	Deed Restrictions	Easements	Federal Interest	Cultural Resources	Hazards	Endangered Species	Boundary Issues
Lower Flat Creek Access	None	None	Yes ¹	None	None	None	None
Stubblefield Access	None	None	Yes ²	None	None	None	None

¹ Federal funds were used in the development of this area, or a portion thereof. The Department must maintain the developed project throughout its useful life. Federal funds may also be used in the management of this land. Fish and wildlife agencies may not allow recreational activities and related facilities that would interfere with the purpose for which the State is managing the land. Other uses may be acceptable and must be assessed in each specific situation.

² Uses of land acquired with federal funds may not interfere with the purpose for which it was acquired. Closures to sport fishing must be based on the recommendations of the state fish and wildlife agency for fish and wildlife management purposes. Federal funds may also be used in the management of this land. Fish and wildlife agencies may not allow recreational activities and related facilities that would interfere with the purpose for which the State is managing the land. Other uses may be acceptable and must be assessed in each specific situation.

MANAGEMENT CONSIDERATIONS

V. Terrestrial Resource Management Considerations

Challenges and Opportunities:

- 1) Maintain adequate riparian corridors.
- 2) Prevent soil erosion.
- 3) Control invasive and exotic species.

Management Objective 1: Maintain riparian corridors as specified in the Missouri Department of Conservation's (the Department's) *Watershed and Stream Management Guidelines* (2009).

Strategy 1: Allow natural vegetative processes to continue in the riparian corridors. (Forestry)

Strategy 2: Replace dead trees, as needed, through natural regeneration and seedling plantings to maintain riparian cover. (Forestry, Fisheries)

Strategy 3: Control access by restricting vehicles to parking lots and boat ramp or boat launching area only. (Forestry, Protection)

Management Objective 2: Prevent soil erosion from existing infrastructure located on the area(s).

Strategy 1: Ensure roads and road-side drainages are managed with Best Management Practices to reduce runoff, sedimentation and erosion. (Design and Development)

Management Objective 3: Control invasive and exotic species.

Strategy 1: Periodically monitor area for invasive and exotic species and use appropriate strategies for management. (Forestry, Fisheries)

VI. Aquatic Resource Management Considerations

Challenges and Opportunities:

- 1) Prevent excessive stream bank erosion.

Management Objective 1: Ensure that infrastructure located on the area(s) does not increase bank erosion.

Strategy 1: Primitive launch areas will be maintained to have a low profile on the bank to prevent back eddies and scouring currents. (Design and Development)

VII. Public Use Management Considerations

Challenges and Opportunities:

- 1) Provide public access along the Flat Creek.
- 2) Inform the public of the opportunities available at these areas.
- 3) Maintain areas in a desirable condition.

Management Objective 1: Maintain suitable public access at each area.

Strategy 1: Ensure existing infrastructure on the area is maintained to Department standards. (Design and Development)

Management Objective 2: Continue to inform the public of the opportunities on these areas.

Strategy 1: Maintain signage at the accesses in accordance with Department policy. (Forestry)

Strategy 2: Work with local media specialist to highlight underutilized resources. (Fisheries, Forestry, Wildlife, Outreach and Education)

Strategy 3: Maintain up-to-date information of all river accesses on Department Web page. (Forestry)

VIII. Administrative Considerations

Challenges and Opportunities:

- 1) Evaluate land offered as additions to these areas.

Management Objective 1: Expand these areas only if unique conditions occur.

Strategy 1: Evaluate any property offered to the Department to ensure it will help promote and enhance the purpose of the area or help to protect sensitive habitat. (Forestry, Fisheries)

Strategy 2: Expansion of these areas should be considered only after review of the work load impacts and whether the area can be maintained using the current staffing level. (Forestry)

Lands Proposed for Acquisition:

When available, adjacent land may be considered for acquisition from willing sellers. Tracts that improve area access, provide public use opportunities, contain unique natural communities and/or species of conservation concern, or meet other Department priorities, as identified in the annual Department land acquisition priorities, may be considered.

MANAGEMENT TIMETABLE

All strategies for this management plan are considered ongoing.

APPENDICES

References:

- Appendix 4. Stubblefield Access Area Background
- Appendix 5. Area Map of Stubblefield Access

Appendix 1. Barry County River Accesses on Flat Creek

Appendix 2. Lower Flat Creek Access Area Background

Lower Flat Creek Access was purchased in 1968. The area consists of small length gravel bars for bank angling that provide access to some rocky areas and root wads for catfish and bass. The area also has a mowed lawn for picnics and family outings along Flat Creek. There is no boat ramp, but canoes can be launched from the gravel bank.

Legal Description: Township 24 N, Range 25 W, Section 34.

Area Location: Lower Flat Creek Access is located 3 miles east of the Highway 39/Route EE junction in Barry County.

Current Land and Water Types:

Land/Water Type	Acres	Miles	% of Area
Warm-season grass fields	3		75
Upland forest	1		25
Total	4		100
Stream frontage (first-order and above)		0.10

VICINITY MAP

Appendix 4. Stubblefield Access Area Background

Stubblefield Access was purchased in 1976. The area is mostly forested with a low sloping stream bank that provides bank anglers good access to bass populations. The area also has an ongoing demonstration area for stream bank stabilization. This area has a small gravel boat ramp.

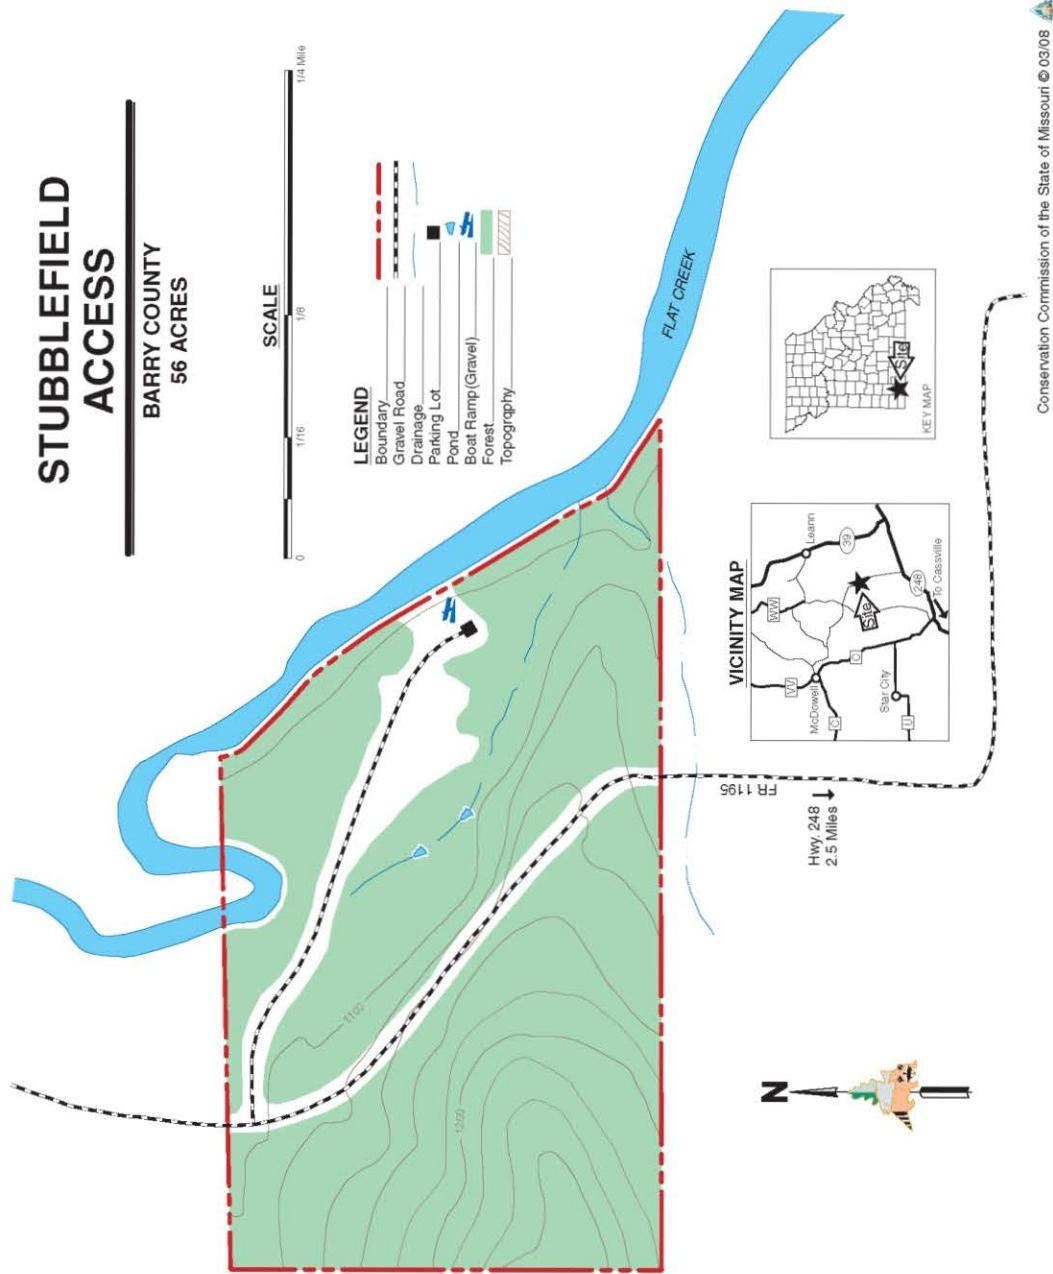

Legal Description: Township 24 N, Range 26 W, Section 15.

Area Location: Stubblefield Access is located 2.5 miles west of the Highway 39/248 junction on Highway 248, then 2.5 miles north on Farm Road 1195.

Current Land and Water Types:

Land/Water Type	Acres	Miles	% of Area
Upland forest	52		93
Old fields/upland fields	4		7
Total	56		100
Stream frontage (first-order and above)		0.20	

Appendix 5. Area Map of Stubblefield Access
